

Esteban Marques

<Technical> Game Designer

I'm a Technical Game Designer based in France with 4 years of experience shipping PC and console titles in small, multidisciplinary teams. I design and implement gameplay systems with a focus on durability and team usability: building data-driven architectures, clear documentation, and workflows that let the whole team iterate safely and efficiently. From early prototype to post-launch updates, I stay involved to make sure the systems I build remain solid, adaptable, and easy to evolve.

<Work Experience>

Associate Lead Game Designer / Technical Designer

Piece of Cake studios | 2024 – 2026

- Architected a data-driven procedural room population system using UE5 PCG Framework and Data Tables
- Scripted gameplay mechanics and multiplayer replication logic in Blueprints with server authority
- Iterated on gameplay content, progression systems, and economy balancing across 12 months of Early Access updates.
- Sole owner of the PCG pipeline in the studio — built comprehensive documentation and presented the full system to ensure continuity after departure
- Coordinated cross-discipline with programmers and artists to define asset constraints, spawn workflows, and level generation parameters
- Supported and unblocked junior designers through regular check-ins, design reviews, and technical guidance

Game Designer

Piece of Cake studios | 2022 – 2024

- Prototyped a C# habitat editor system and supervised its full integration into production
- Developed a C# tooltip system and coordinated directly with the gameplay programmer on all economy-related features
- Designed and integrated UI/UX mockups and gameplay systems directly in engine

Game Designer Intern

Piece of Cake studios | 2022

- Designed and scripted gameplay objectives and UI systems using visual scripting in Unity
- Balanced gameplay systems and documented feature proposals for new in-game buildings
- Collaborated with external QA and translation teams for multiplatform release

<Education>

Master's Degree (Y2) in Game Design

Université de Lorraine | 2021 - 2022

Master's Degree (Y1) in Digital Design

Université Savoie Mont-Blanc | 2020 - 2021

Bachelor's Degree in Digital Design

Université de Toulon | 2019 - 2020

Technical Degree in Communication

Centre National de l'Éducation à Distance | 2017 - 2019
